

# VIRTUAL RED TEAM PENTESTING AS A SERVICE

## Continuous Security Verification

Finding and fixing vulnerabilities, default configurations, weak credentials, and other exposures one or two times a year is not sufficient. Changes to your technology environment and the cyber-threat landscape are far too frequent for this to remain an acceptable practice.

### Continuous pentesting helps organizations address key security questions about their environment:

- Are my “crown jewels” systems and data secure?
- What urgent issues must I remediate immediately?
- How should I prioritize my vulnerabilities and other defensive efforts?
- Are detection & remediation times improving?
- Are my security tools and procedures effective?
- Am I lowering the impact risk of a cyber attack?

#### KEY FEATURES

- Adaptable services based on your cyber maturity level
- Service tiers for any sized environment
- Our engineers find, verify, and provide proof of exploitable vulnerabilities
- Internal and External PenTesting
- Detailed fix-action reports guide your remediation activities
- Partnership approach where we act as an extension to your team

The Legion Virtual Red Team is an ongoing pentesting service that hardens your environment by finding exploitable vulnerabilities and guiding your remediation activities to close attack vectors.

Our mission is to help every customer build and sustain a highly secure environment.

Our process is collaborative, working with you to solve security and compliance challenges together.

# VRT Benefits

**LEGION**  
CYBERWORKS

PEN-TESTING | MANAGED SECURITY |  
INCIDENT RESPONSE | XDR

## Accuracy

We will help you focus on fixing problems that can actually be exploited, saving you and your team from chasing down unexploitable vulnerabilities and false positives.

## Speed

We can assess your entire organization in a matter of hours, versus waiting weeks or months for consultants to manually run scans and produce reports.

## Remediation

Our goal is to create the conditions for action – helping you quickly find, fix, and verify that an exploitable vulnerability is no longer a threat. The Red and Blue teams must work together, and Legion helps you build a Purple Team culture!

Like APTs, ransomware, and other threat actors, The Legion VRT discovers and fingerprints your internal and external attack surface, identifying the ways exploitable vulnerabilities, misconfigurations, harvested credentials, and dangerous product defaults can be chained together to facilitate a compromise.

## Effort

Our VRT can be up and running in about an hour instead of weeks like with traditional PenTesting. And there are no credentialed agents to install and manage.

## Coverage

Legion assess your entire network from the attacker's point of view, not just a sample. Our platform algorithm fingerprints your internal, external, on-prem, IoT, identity, and cloud attack surfaces.

# What's Included

**LEGION  
CYBERWORKS**

PEN-TESTING | MANAGED SECURITY |  
INCIDENT RESPONSE | XDR

## **PENTEST UNLIMITED IP ADDRESSES**

There are no limits on the number of IP addresses within your environment, allowing you to scale your pentests as your environment changes. We have service tiers covering small businesses up to large enterprises.

## **EXPERIENCED SECURITY ENGINEERS**

Our experienced security engineers review each "Pentest Op" run within your environment, and they conduct Post-Op review sessions with you and your team to be sure all of your questions are answered.

## **POST-OP REVIEW**

Our team collaborates with yours in post-op review sessions where we review discovered weaknesses and impacts, and guide the prioritization of fix-actions.

## **DETAILED REPORTING**

You will receive reports for each pentest including a high level executive summary, a detailed penetration test report, a segmentation report, and a fix-actions report to guide your remediation activities.

## **SERVICE DELIVERY MODEL**

Our pentesting-as-a-service delivery model grows and changes with your organization. We roll in new campaigns over time including external pentesting, simulated phishing attacks, purple teaming, and table top exercises. This approach continues delivering value over time and provides for better security.

## **PROFESSIONAL SERVICES**

Legion Cyberworks can perform additional PenTesting to cover your web applications, APIs, and mobile apps as needed through a prepaid retainer or a fixed fee project Statement of Work.

# **PROVEN**

Our team uses proven processes, tools, and industry experience to deliver excellence every single day. We focus on what matters most in terms of cybersecurity, and that is exploitability, likelihood, and impact. This approach to security produces a stronger security posture for our customers, and helps them invest in security more effectively. Legion hires and retains talented, skilled, and qualified staff to ensure our customers get the best.

# **CYBER DEFENSE**

At Legion Cyberworks we do one thing: Protect our clients against the constant inflow of cyber-threats. Whether we're working with you in a consulting capacity, delivering penetration testing or other offensive security services, or protecting your business through our managed security services, we are singularly focused on keeping your business shielded from ransomware, exploits, hackers, and other cyber-threats. You are our business partner, and we make it our mission to protect your business.

# **LEADERS**

Keeping pace with trends in technology, security, and data privacy regulations allows us to work closely with our clients, law enforcement, our alliance partners, and peers in our industry to develop and continuously improve training, tooling, and our processes to degrade and defeat cyber-threats of all types. We develop high quality relationships with our customers and we deeply value our role as 'servant leaders' on a mission to protect their business. Our customers trust us to deliver the highest quality consulting, managed security, and professional services, and this is our highest honor.
