

# Holiday Special – Gift Your Organization with our Core MXDR Service

Secure your organization's future with enterprise-grade protection at an exceptional value. For a limited time, new clients who commit to a 24-month agreement receive **10% off** our comprehensive **Core MXDR Service** – your complete managed detection and response solution.

This exclusive holiday offer combines cutting-edge security technology with round-the-clock expert monitoring, delivering the protection your business needs at a price that makes sense.

Valid only through **December 31, 2025**, this is your opportunity to elevate your security posture while optimizing your budget for the year ahead.

# Transparent, Value-Driven Pricing

Security shouldn't be complicated or unpredictable. Our Core MXDR Service offers straightforward monthly pricing that includes everything you need to maintain a strong security posture. No hidden fees, no surprise charges – just comprehensive protection at a price you can plan for.

With this limited-time holiday promotion, you'll receive substantial savings while locking in predictable costs for two full years. This pricing stability helps you budget confidently while ensuring your security infrastructure keeps pace with evolving threats.

## \$2,500

### Standard Monthly Rate

Regular pricing for our Cyber Core MXDR Service

## \$2,250

### Holiday Discounted Rate

Your monthly investment with 10% savings

## \$6,000

### Annual Savings

Total savings over the 24-month agreement period

*Any additional add-on subscriptions you choose – whether advanced AI Pentesting as a Service, Email Security, additional device coverage, or specialized security services – will also receive the full 10% discount, maximizing your value.*

This is a significant investment in your organization's resilience. Consider that the **average cost of a data breach for small and midsize businesses exceeds \$100,000** when factoring in downtime, remediation, legal fees, and reputational damage. **For less than the cost of a single entry-level employee, you gain access to an entire team of security experts and enterprise-grade technology.**

# Complete Protection: What's Included

The Core MXDR Service delivers a comprehensive security ecosystem designed to detect, respond to, and neutralize threats across your entire IT environment. Our integrated approach combines multiple security disciplines into one seamless solution, eliminating gaps in your defense strategy.

## Managed SIEM

Centralized security information and event management provides comprehensive visibility across your entire infrastructure, correlating threats in real-time.

## 24×7 SOC Monitoring

Our expert security analysts monitor your environment around the clock, ensuring immediate detection and response to suspicious activities at any hour.

## MXDR Coverage

Managed Extended Detection and Response spans your network, endpoints, cloud, and business applications for broad threat hunting and remediation.

## 12-Month SIEM Log Retention

Complete forensic capabilities with a full year of searchable security logs for compliance, investigation, and threat analysis purposes. Excellent for HIPAA, PCI, and SOC 2.

## Identity Threat Detection & Response (ITDR)

Protect against credential theft, privilege escalation, and identity-based attacks with specialized monitoring of authentication systems and user behavior.

## Endpoint Detection & Response (EDR)

Advanced endpoint protection monitors workstations, servers, and mobile devices for malicious activity, ransomware, and zero-day exploits.

## CyberSecurity Essentials

Email Security Filtering, Dark Web Monitoring, Security Awareness Training, Cloud Data Protection, External Footprint Scanning

 **Coverage Included:** The service covers up to 20 devices and users, providing robust protection for small-to-midsize enterprise environments without complex per-device pricing structures.

# Your Path to Protected Operations

Implementing enterprise-grade security doesn't have to be complex or disruptive. Our streamlined onboarding process is designed to get your organization protected quickly while ensuring every component is properly configured for optimal detection and response. Here's exactly what to expect when you take advantage of this holiday offer.

01

## Schedule Your Consultation Call

Connect with our security specialists to review your current environment, discuss specific concerns, and identify the optimal configuration for your infrastructure and risk profile.

02

## Configure Your Service Package

Select the Cyber Core MXDR Service and choose any additional add-ons that address your unique requirements – all at the discounted holiday rate.

03

## Execute Your Agreement

Sign the 24-month service agreement to lock in your discounted monthly rate of \$1,980, securing predictable costs and comprehensive protection for two full years.

04

## Begin Rapid Onboarding

Our technical team initiates the deployment process immediately, installing sensors, configuring integrations, and establishing baseline monitoring parameters.

05

## Activate 24×7 Monitoring

Within days, your environment is fully monitored by our Security Operations Center. Round-the-clock protection begins, with expert analysts watching for threats and ready to respond.

**Typical Timeline:** Most organizations move from signed agreement to active monitoring in approximately two weeks. Our experienced onboarding team handles the technical complexity while minimizing disruption to your operations.

Throughout the onboarding process and beyond, you'll have access to dedicated support specialists who understand your environment and are invested in your security success. This isn't just a technology deployment – it's the beginning of a partnership focused on keeping your organization safe.

# Make 2026 Your Most Secure Year Yet

The threat landscape continues to evolve, but your defense strategy can evolve faster. With our Core MXDR Service, you gain more than security technology – you gain peace of mind knowing that expert analysts are monitoring your environment every hour of every day.

This isn't just about preventing attacks. It's about protecting your team's productivity, safeguarding your customers' trust, and ensuring business continuity when threats emerge. It's about having the confidence to innovate and grow without constantly worrying about the next security incident.

## Protect Your Team

Enable your staff to work confidently, knowing robust security controls are defending against phishing, malware, and credential attacks.

## Safeguard Your Data

Comprehensive monitoring and response capabilities protect your sensitive information from theft, ransomware, and unauthorized access.

## Preserve Your Reputation

Avoid the devastating financial and reputational consequences of a publicized breach with proactive threat detection and rapid incident response.

**Don't let this opportunity pass.**

This limited-time holiday offer expires **December 31, 2025**. Every day without comprehensive detection and response is a day of unnecessary risk.

The decision you make today will impact your organization's security posture for years to come. Choose to invest in proven, enterprise-grade protection that scales with your business and adapts to emerging threats. Choose the confidence that comes from knowing expert security professionals are watching over your environment 24×7.
